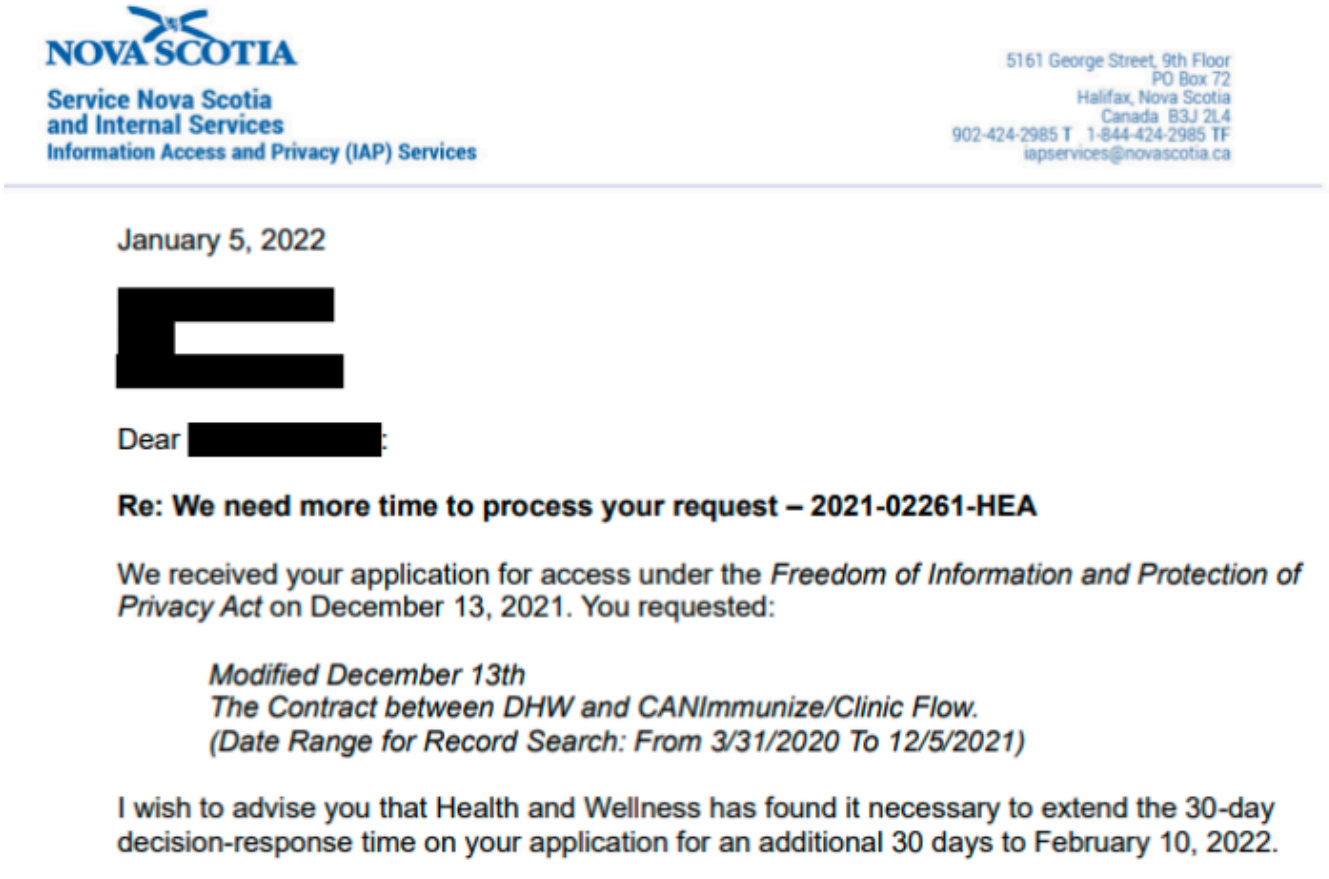
Dear [redacted]:

Re: You are entitled to part of the information you requested – 2021-02261-HEA

The Department of Health and Wellness received your application for access to information under the *Freedom of Information and Protection of Privacy Act* (the Act) on December 6, 2021.

In your application, you requested a copy of the following records:

Modified December 13th
The Contract between DHW and CANImmunize/Clinic Flow.
(Date Range for Record Search: From 3/31/2020 To 12/5/2021)



NOVA SCOTIA

Dear [redacted]:

Re: We need more time to process your request – 2021-02261-HEA

We received your application for access under the *Freedom of Information and Protection of Privacy Act* on December 13, 2021. You requested:

Modified December 13th
The Contract between DHW and CANImmunize/Clinic Flow.
(Date Range for Record Search: From 3/31/2020 To 12/5/2021)

I wish to advise you that Health and Wellness has found it necessary to extend the 30-day decision-response time on your application for an additional 30 days to February 10, 2022.

Freedom of information requests (or access to information) can often unearth a treasure trove of data. Alternatively, it can force the body in question to admit that it doesn't have records that are being sought. After 2 years of this "pandemic" nonsense, one would think that a huge body of evidence had piled up.

Our friend in Nova Scotia is back at it again, digging up dirt and information about the tyranny of Robert Strang. Here are some of the latest finds. Previously, there was the hospitalization scam debunked, the lack of data for masks in schools, the screwy definition of "cases", Nova Scotia reduced (yes, reduced) ICU capacity, and they have no evidence "asymptomatic spreading" is something that even exists.

In today's news, she finally (sort of), received the contract from the Nova Scotia Government regarding the arrangement between the Province and CANImmunize/Clinic Flow. Included was a NOTICE that the bulk of it would be redacted since it would interfere with the privacy of a third party. Here is what they included as a justification.

You are entitled to part of the records requested. However, we have removed some of the information from this record according to subsection 5(2) of the *Act*. The severed information is exempt from disclosure under the Act for the following reasons:

- Section 20: unreasonable invasion of personal privacy.
  - 20(1) , The head of a public body shall refuse to disclose personal information to an applicant if the disclosure would be an unreasonable invasion of a third party's personal privacy.

- Section 21: business confidential information.
  - 21(1), The head of a public body shall refuse to disclose to an applicant information that would reveal commercial, financial information of a third party.

The remainder of the records are enclosed.

That's right. That Government won't let us know about the arrangement of the vaccine passport app, and the threats to our privacy…. since that would harm the privacy of the provider. That would seem pretty backwards to most rational people.

What information will these "movement licenses" be retaining, who will have access, and how long will it remain? Also, can the data be bought or bartered by 3rd parties, who wish to use it for marketing? Will other Government bodies see a use in monitoring the public?

Hopefully, no one in the comments will argue that they turned "something" over. When the bulk of the content is removed, that's not meaningful disclosure.

Considering that the original FOI request had to be extended beyond the regular time limits, this is especially a slap in the face.

If it's any consolation, the Nova Scotia Government has been criticized for unnecessary delays when it comes to processing FOI requests. That said, the Province is still run by a tyrant, now Tim Houston. It seems that throwing out the Liberals to vote in Conservatives resulted in no difference in policies.

In another released result, it seems that people in Nova Scotia are admitted to the ICU for many reasons other than this so-called virus. A lengthy document, but worth at least browsing.

Nova Scotia, on the subject of "herd immunity, natural immunity", has done something of a document dump. Here is what they sent out in response. Now, there are pending FOI requests, and more information will be shared as it becomes available.

Note: if the formats seem a bit off, there were conversion issues when scrubbing personal information. The contents are still the same.

It's encouraging that someone is taking the time and effort to dig up this information on their Government, and share it with the public. Far too little of this is happening.
